## Environment and Energy Usage Policy

Madurai Institute of Social Sciences recognizes the importance of environmental stewardship and the responsible use of energy to foster a more sustainable and greener world. This Environment and Energy Usage Policy will encourage smart, sustainable practices in the college.

### Objective:

- To educate students, faculty, and staff about the importance of environmental conservation, sustainability,
- To encourage the efficient use of energy across the campus by reducing energy consumption, and adopting energy-saving practices.

### Policy Overview

#### Energy Assessment:

Regularly check how much energy we use and its impact on the environment.

#### Reduce Local Pollution:

Promote using eco-friendly transportation like bicycles, public transit, and walking to reduce air pollution.

#### Save Energy:

Use LED lights throughout the campus to save energy.

Effective functioning of the existing needs to be ensured.

Organize tree planting events every year.

#### Collaboration:

Collaborate with government agencies and local NGOs to conduct awareness programs focused on energy efficiency and sustainable environmental practices.

Stay updated on new environmental and energy issues and address them.

#### Education and Training:

Offer training on how to save energy and protect the environment and conduct workshops, seminars on eco-friendly practices
